**Georgia's Clean Air Force Launches New Website [www.cleanairforce.com](http://www.cleanairforce.com)**

**New Website Offers Georgians Updated Resources to Assist with Emissions Testing**

ATLANTA (Nov. 3, 2022) – [Georgia's Clean Air Force](http://www.cleanairforce.com) (GCAF), in partnership with the Georgia Environmental Protection Division (EPD), announces the launch of its new and improved website, [www.cleanairforce.com](http://www.cleanairforce.com), as a comprehensive resource for metro Atlanta motorists seeking to complete their annual emissions test.

“Georgia’s Clean Air Force works hard to ensure program information and its resources are easily accessible and useful to Georgia motorists who seek vehicle emissions testing assistance,” said Michael Odom, Mobile & Area Sources Manager, Georgia EPD. “We are proud of the newly upgraded website and we hope that motorists find it easy to locate information they are seeking about the program.”

Along with a new design and improved user-friendly features, the website now includes a translation option of program information throughout the website into Spanish, Korean, Vietnamese and Mandarin Chinese, along with an online comment card in Spanish. For current and prospective inspectors, an online interactive practice test has been added.

A plethora of program information is available for motorists, inspection stations, and the repair industry. Specifically for motorists, the website offers tips on what to do before and after testing, including retest and repair information. Additionally, the website includes a vehicle inspection report summary look-up tool, location search for inspection stations via zip code, and waiver, exemption, and extension information.

**About Georgia's Clean Air Force**

Georgia's Clean Air Force (GCAF), in partnership with the Environmental Protection Division (EPD), is responsible for the management of the Enhanced Vehicle Emission Inspection and Maintenance (I/M) Program throughout Atlanta's 13 metro counties. Since 1996, Georgia's Inspection and Maintenance Program has prevented nearly 2.1 million tons of harmful ozone-forming pollutants from entering the air we breathe. The program has also identified and repaired more than 4.1 million heavy-polluting vehicles. For more information, please visit <http://www.cleanairforce.com/>.
